COURSE AIM:

This course aims to shed light on the buzz word 'biofilm' and its role in periodontal disease. It will provide an update on current management and practical treatment of more advanced periodontal patients. The procedure of 'Root Surface Debridement' with ultrasonic and hand instruments will be reviewed with an opportunity to adapt new and existing skills on phantom heads.

COURSE OBJECTIVES:

By the end of the session the participants will be able to:

1. Understand the formation of biofilm in the oral cavity.
2. Describe the role of the biofilm in periodontal disease.
