

**MOS -“THE NEXT STEP”
(SW14-03-31-1)**

Date and venue:

Wednesday, 7th May 2014
Seminar Room,
Dept. of Oral & Maxillofacial Surgery
Great Western Hospital
Swindon

Course Organiser:

Colin Borland

Course Lecturers:

Colin Borland
Suzanne Lello

Programme

18.00 - 18.15	Registration
18.15 – 20.15	Overview of tooth sectioning and bone removal
	Minimal Flap Design
	Hands – on :- sectioning teeth on models

Aims

To increase the confidence and skills of delegates in removing teeth and roots, when surgical intervention is required.

Objectives

- To be able to section molar teeth to facilitate their removal.
- To be able to remove alveolar bone where needed for tooth/root removal.
- To know how to raise flaps as appropriate to aid in exodontia.

Please could delegates bring:

- A scalpel handle
- Mitchell's Trimmer or Howarth's Periosteal Elevator
- Coupland Elevators or Luxators
