**Course Aim:-**

Waste Management:-

- To update the delegates on current waste management policy and how to manage this in the general dental practice.
- To refresh on hand hygiene, practice cleaning and decontamination room validation.

Special Care Dentistry:-

- To educate DCP's about special care dentistry

**Course Objectives:-**

Waste Management:-

- To recognise the risks associated with incorrect disposal of waste.
- To review their current waste management policy and discuss any changes required.

Special Care Dentistry:-

- To be able to recognise who may be a special care patient.
- To recognise potential barriers for special care patients to access dental treatment.

**Learning Outcomes:-**

By the end of the day delegates will be able to:-

Waste Management:-

- Able to recognise the risks associated with incorrect disposal of waste.
- Able to review their current waste management policy and discuss any changes required.

Special Care Dentistry:-

- To be able to facilitate dental treatment for dental patients with special needs in your own practice.
- To know what referral services are available for special care patients.
