15.00-15.15 Tea/Coffee

15.15-16.15 Management of peri-implantitis

16.15-16.30 Questions and feedback.

Aims and objectives –

1) List the current classification of periodontal disease.

- 2) Describe the rationale for non-surgical periodontal therapy and be aware of the different adjunctive treatments including antibiotics and when they are indicated.
- 3) Understand the importance of and the impact of supportive periodontal therapy.
- 4) Understand periodontal treatment options for improving aesthetics in the periodontally compromised patient.
- 5) Understand the basics of peri-implantitis and what the team can do.
