

Implants in Treatment Planning in General Dental Practice

Lecturer:

**Don Weerasirie BDS MFDS RCPS
General Dental Practitioner**

Date and Venue:

**Friday 18 September 2015
The Alverton Hotel, Truro**

Course Organiser

Carrie Bradburn, Dental Postgraduate Tutor

PROGRAMME

09.00 – 09.15	Tea/Coffee/Registration
09.15 – 11.00	Principles and benefits of modern implant dentistry. What routine implant treatments are available - have the confidence to discuss the options with patients. Know when to discuss implants as a treatment option with your patients, i.e. before or after extraction? Which implant treatments are predictable, safe and have high success rates.
11.00 – 11.15	Tea/Coffee
11.15 – 12.15	An overview of simple to complex cases covering implant retained dentures, implant retained bridges and single tooth replacement. Current minimally invasive sinus and bone augmentation techniques. How to maintain dental implants long term.
12.15 – 12.30	Discussion and Close

AIM: To enable GDP's to understand the principles and benefits of dental implants so they have the confidence to incorporate them as part of routine treatment planning.

OBJECTIVES:

At the end of the course participants will:

1. Understand the principles and benefits of modern implant dentistry.
2. Understand what routine implant treatments are available so you have the confidence to discuss the options with patients.
3. Understand how to maintain dental implants long term.

OUTCOME: GDP participants will leave with the confidence to be able to explain the principles and benefits of dental implants to their patients in an informed manner
