

‘Essential Periodontics: Surgery for the Diseased Patient’

Date and venue:

Thursday 22nd September 2016

Postgraduate Medical Centre, Royal United Hospital Bath

Course Lecturers:

Dr Phil Ower and Dr Sarovi Drone

Aims and Objectives:

1. To appreciate the indications and contraindications for surgical periodontal therapy.
2. To understand the principals of periodontal surgical technique.
3. To understand the treatment options for vertical bone defects.
4. To understand the principles of root resection techniques.

The course should enable participants to:

1. Carry out simple pocket reduction surgery.
2. Manage vertical bone defects predictably.
3. Carry out resection procedures.
