

‘Essential Periodontics: Pre-restorative and Mucogingival Surgery’

Date and venue:
Friday 23rd September 2016

Postgraduate Medical Centre, Royal United Hospital Bath

Course Lecturers:
Dr Phil Ower and Dr Sarovi Drone

Aims and Objectives:

1. To appreciate the indications and contraindications for surgical crown lengthening and other pre-restorative techniques.
2. To understand the principals of periodontal plastic surgery.
3. To understand the relevance of root coverage procedures.
4. To understand the advantages and disadvantages of different root coverage techniques.

The course should enable participants to:

1. Carry out simple crown lengthening procedures.
2. Use pre-restorative surgery in complex restorative cases.
3. Discuss the benefits of periodontal plastic surgery with patients.
4. Carry out simple roof coverage procedures.
