Aim:

This course will include problem solving to assess current treatment planning methods and enable the dental team to improve periodontal treatment planning in general dental practice.

Objectives: by the end of the course, participants will;

1. Understand the process of assessing, diagnosing and effectively treatment plan patients with periodontal disease.
2. Design treatment plans for a variety of periodontal diagnoses with the aid of case studies.
3. Liaise with other members of the team in providing sound care and management.

Learning outcomes:

1. Effectively identify and diagnose types of periodontal disease including spotting more challenging cases
2. Recognise & use appropriate methods of diagnosis and assessment
3. Formulate treatment plans for patients with periodontal disease
