Programme

09.15- 09.30	Registration
09.30 -10.45	Session 1: The role of the Medical History.
10.45 -11.15	Coffee
11.15-12.45	Session 2: Oral surgery and pharmacology- an update on Anti-resorptive drugs and new generation oral anti-coagulants.
12.45-13.45	Lunch
13.45-15.00	Session 3: Oral surgery- Techniques and troubleshooting common surgical problems .
15.15-15.30	Coffee
15.30-16.30	Session 4 The “high risk” third molar- diagnosis and modern management strategies.
	Questions and feedback.

Aims –

- 1) To recognise the importance of a comprehensive pre-treatment medical history.
- 2) To describe some top tips for successful minor oral surgery in general practice.
- 3) To describe the common complications in minor oral surgery and provide information on how to manage them.
- 4) To recognise the problems presented by new generation oral anticoagulants and bisphosphonates.
- 5) To be able to diagnose and have strategies for the “high risk” third molar.

Objectives-

- 1) To realise the importance of a comprehensive medical history.

- 2) To realise the potential problems presented by new generation anti-coagulants and bisphosphonates.
- 3) To preempt and realise when complications may arise and what to do subsequently.
- 4) To be able to identify and realise the differing strategies for the treatment of “high risk “ third molars.
