

IGPR Clinical Supervisor Course

Thursday 5th September 2019

Thorpe Park Hall
1150 Century Way
Leeds
LS15 8ZB

IGPR Clinical Supervisor Course

This is a course for General Practitioners who wish to Clinically Supervise the International General Practitioner (IGP) recruit in a Primary Care learning environment. This course is recommended (also a GMC requirement) for all the doctors who wish to be Clinical Supervisors or Educational Supervisors for the IGPs. If you are already a Foundation Year Trainer or a GP Trainer you will find this course will help you supervise and support the training of the IGPs.

Structure of the course

The course will be run over the whole day (9:00-4:30).

There will be some presentations but most of the course learning will be provided in a small group format.

Objectives

By the end of the course the participant will:-

- Have a clear understanding of the role of a Clinical Supervisor and the primary health care team in learning and supervision of IGP
- Have knowledge of the curriculum and how to identify the learning needs of the IGP
- Be able to structure a teaching session for a learner and be aware of basic methods of teaching
- Be able to teach and assess communication skills within the workplace
- Understand the assessments that will be required and how to complete them
- Have developed their own personal learning plan related to their role as a Clinical Supervisor

Pre Course work

Before coming to the course, we recommend you:

- Complete the self-evaluation form that is attached

Self-Evaluation form for the IGPR Clinical Supervisor Course

At the start of the course we will consider where you and your practice are in relation to clinical supervision. Please complete this sheet to help with the discussion.

What do I personally need to do and know before starting as a supervisor?
A clinical supervisor will need support, where will mine come from?
How can my practice manager help?
How can other members of the practice team help?
What space or facilities will I need?
What time will I need and how can this be managed?
Which learners do I plan to supervise in my practice?
What will a learner need when they come to my practice?
What sort of things can I expect learners do in primary care?
Any other thoughts?
