Info for Maxcourse

Course description

This one day event for DCPs will provide up to **5** hours CPD from **4** core areas of study.

Aims:

SESSION 1

Medical Emergencies Part 1

Aims:

Delegates will be instructed and guided through a variety of medical emergency situations that could occur both in dental practice and in technician laboratories.

Infection Control Part 1

This session will explain:

1. Infections relevant to dentistry
2. Transmission of disease
3. Discussion regarding the correct, best practice use of personal protective equipment (HTM 01-05)
4. Explanation of the three levels of hand hygiene, as directed by HTM 01-05
5. Demonstration of how to undertake in-house hand hygiene training and aseptic glove removal (Reference: HTM 01-05 & GDC educational outcomes)

Technicians: Materials and Equipment Part 1

Aims: TBC

SESSION2

Medical Emergencies Part 2

Aims:

Delegates will have the opportunity to recognise the signs and symptoms of a serious medical emergency and undertake practical application for CPR and BLS.

Complaints part 1

Aims:

Discuss the factors that can lead to a complaint being made and ways to avoid them.

Radiology and radiation protection – Part 1

Aims:

Provide a better understanding of the DCP role in preparing the patient for xrays, processing films, mounting radiographs and recognising the use of a variety of different radiographic techniques. Fault finding, auditing and quality assurance will be discussed.

SESSION 3

Medical Emergencies Part 1

Aims:

Delegates will be instructed and guided through a variety of medical emergency situations that could occur both in dental practice and in technician laboratories.

Infection Control Part 2

Understanding the requirements of the Health technical memoranda 01-05

This session will explain:

1. Decontamination of the dental environment
2. Decontamination of dental instruments
3. Traceability of dental instruments
4. Validation of decontamination/sterilization equipment
5. Dental Unit Water line procedures
6. Dental practice requirements for the prevention of Legionella

Technicians: Materials and Equipment Part 2

Aims: TBC

SESSION 4

Medical Emergencies Part 2

Aims:

Delegates will have the opportunity to recognise the signs and symptoms of a serious medical emergency and undertake practical application for CPR and BLS.

Complaints Part 2

Aims:

Delegates will be able to discuss ethics and the dental professionals role in maintaining the GDCs key principles of professionalism.

Radiology and radiation protection – Part 2

Aims:

Delegates will be able to recognise the regulations which govern the taking of xrays, hazards associated with radiation in the dental surgery, precautions taken to limit radiation hazards, principles and techniques of taking dental xrays.

Objectives

SESSION 1

Medical Emergencies Part 1

By the end of the session delegates will be able to:

Recognise the signs and symptoms for a variety of medical emergency conditions that may present themselves in dental practice and laboratories.

Administer immediate first aid treatment to ensure patient and colleague safety and prevent conditions becoming worse.

Infection Control Part 1

This session will explain:

1. Infections relevant to dentistry
2. Transmission of disease
3. Discussion regarding the correct, best practice use of personal protective equipment (HTM 01-05)

4. Explanation of the three levels of hand hygiene, as directed by HTM 01-05
5. Demonstration of how to undertake in-house hand hygiene training and aseptic glove removal (Reference: HTM 01-05 & GDC educational outcomes)

Materials and Equipment Part 1

TBC

SESSION 2

Medical Emergencies Part 2

By the end of the session delegates will be able to:

Recognise the signs and symptoms of serious medical emergency and immediately administer appropriate treatment.

Simulate CPR in order to save lives

Complaints Part 1

By the end of the course delegates will be able to:

1. Discuss the importance of good communication skills in avoiding and handling complaints.
2. Recognise behaviours that can result in a complaint being made.
3. Best practice in responding to a complaint.

Radiology and radiation protection – Part 1

Learning outcomes: By the end of the session delegates will be able to:

Recognise the use of dental radiography in assessing oral health.

Understand and be able to describe the use of various radiographic techniques

Describe processing techniques, maintaining equipment, storing chemicals

Support and care of the patient to facilitate treatment.

Have a clear understanding in their role to support auditing and quality assurance.

SESSION 3

Medical Emergencies Part 1

By the end of the session delegates will be able to:

Recognise the signs and symptoms for a variety of medical emergency conditions that may present themselves in dental practice and laboratories.

Administer immediate first aid treatment to ensure patient and colleague safety and prevent conditions becoming worse.

Infection Control Part 2

Understanding the requirements of the Health technical memoranda 01-05

This session will explain:

1. Decontamination of the dental environment
2. Decontamination of dental instruments
3. Traceability of dental instruments
4. Validation of decontamination/sterilization equipment
5. Dental Unit Water line procedures
6. Dental practice requirements for the prevention of Legionella

Materials and Equipment Part 2

TBC

SESSION 4

Medical Emergencies Part 2

By the end of the session delegates will be able to:

Recognise the signs and symptoms of serious medical emergency and immediately administer appropriate treatment.

Simulate CPR in order to save lives

Complaints Part 2

By the end of the session delegates will be able to

Understand the 6 key principles from the GDC and recognise how their role as a dental professional impacts upon their behaviour and professionalism

Radiology and radiation protection – Part 2

Learning outcomes: By the end of the session delegates will be able to:

Understand how ionising radiation is produced

Recognise the hazards associated with radiation in the dental surgery

Discuss the principles of radiation protection

Have a better understanding of the legislation that governs radiation within dental practice

Delegate Name: _____

User ID: _____

Please select which sessions you would like to attend in order of preference, places will be allocated on a strict first come first served basis.

Session 1 – 09.30-10.45

	1st choice	2nd choice	3rd choice
Medical Emergencies - Part 1			
Infection Control – Part 1			
Technicians: Materials/Equipment - Part 1			

Session 2 – 11.00-12.15

	1st choice	2nd choice	3rd choice
Medical Emergencies – Part 2			
Complaints – Part 1			
Radiology and radiation protection – Part 1			

Session 3 – 13.15-14.30

	1st choice	2nd choice	3rd choice
Medical Emergencies – Part 1			
Infection Control – Part 2			
Technicians: Materials/Equipment – Part 2			

Session 4 – 14.45-16.00

	1st choice	2nd choice	3rd choice
Medical Emergencies – Part 2			
Complaints – Part 2			
Radiology and radiation protection – Part 2
