Falls (per 1000 bed days)

Monthly falls on L21

SOCIAL STYLES GRID

Write your totals from the self inventory .	Down	Up	Left	Right

Step 1.

Bring your four digit score from the previous page and write the appropriate number in the box. The Down and the Up numbers should total 9 when added together, as should the Left and Right.

Step 2.

To locate your style on the grid start from the center location (the red * dot). 1- Calculate the difference between the Down and the Up scores and starting at the red dot, to the number of lines that is in the greater direction. That is, if Down is 6 and Up is 3 lines/dashes. Do the same for the Left and Right scores. That will place your score at a coordinate in one of the 16 boxes. Styles below the center line are more Responsive. Styles to the Right center line are more Assertive.

SOCIAL STYLE SELF-INVENTORY

Be sure to mark only one statement from each of the pairs. Be sure to put the X in the correct box. There is no wrong answer.

		D	U	L	R
1. More gestures Fewer gestures					
2. Speaks more softly Speaks more loudly					
3. Freer, more flowing body movements More controlled body movements					
4. Speaks more slowly Speaks more rapidly
