

# Dementia: How can we make the dental visit a good experience for dementia patients and their carers?

**Providing a new approach to Peer Review:  
Education and Debate (Invitation only)**

## Overview of Evening

*Dementia is becoming increasingly prevalent, due to our ageing population and improved recognition of the condition. However, the nature of dementia means that managing the condition can pose unique and sometimes difficult issues, in Primary Dental Care.*

*This event will see the Launch the Dementia Tool Kit. The tool kit support the implementation of both the National Dementia Strategy and also offers further information in line with relevant legislation, such as the Mental Capacity Act 2005. The learning materials reinforce the importance of dementia being everyone's business*
