

A Hands On Course for Dentists

Complete Dentures

Denture problem solving

Aim

This one day hands on course will provide you with current thinking on techniques in denture making and how to manage patient's expectations.

Objectives

- Understand the importance of accurate impressions
- How to record accurately the inter-arch relationship and to know when to take a facebow record
- How to choose the shape and size of tooth effecting speech changes
- To provide a basis for trouble shooting and to know what to do and when
- Advocate assessing complete denture patients in a structured protocol
- Correctly manage complete denture patients and their expectations
- Modify current practice in relation to best clinical guidelines
- Identify factors which cause problems and how to solve them

Learning Outcomes

Review the process and management of those patients receiving complete dentures.

This course qualifies for 5 ½ hours verifiable CPD
