

Preparation Course for the NEBDN Certificate In Dental Sedation Nursing

The Certificate in Dental Sedation Nursing is a qualification suitable for qualified and GDC registered dental nurses who assist in the surgery during routine conscious sedation.

Course Aim

This course prepares Registered Dental Nurses for the National Examination Board for Dental Nurses (NEBDN) organised Certificate in Dental Sedation Nursing.

This course builds upon the knowledge, skills and clinical experience you develop in assisting in the care of sedated patients in your work place

The course will be held in Education Wing of University of Liverpool Dental School, between September 2014 and March 2015, and consists of 6 study days, the dates for which are as follows:

Thursday 18th September 2014

Tuesday 6th January 2015

Thursday 23rd October 2014

Thursday 5th February 2015

Thursday 18th December 2014

Thursday 12th March 2015

It is strongly recommended that delegates attend all study days.

Both the preparatory course and the national examination in Dental Sedation Nursing are demanding and will require the delegate to invest a considerable amount of time reading around the subject and preparing work. Regular revision is required over the 6 month period leading to the NEBDN examination. Delegates will need support from the clinicians they work with.

In order to achieve your target for the NEBDN Record of Experience, (***The NEBDN have advised that RoE requirements are subject to change and will advise the training Centre of this change in due course, the proposed changes had not been received at the time of producing this flyer***) you will be required to assist in the care of 25 patients who have received conscious sedation. You will, therefore, be expected to regularly assist in the care of the sedated patient; this will usually be in your own dental clinic/practice. If you do not assist in the care of sedated patients within your practice, we advise you to organise attendance at other sedation practices prior to registering for this course. Frequent access to managing patients under nitrous oxide inhalation sedation and IV midazolam sedation is essential. The Dental School **cannot** arrange for this chair side clinical experience.

Course Fee

The course fee, which covers attendance at all 6 study days, is £710.00. However, if the practice/clinic, in which you are employed, treats predominately NHS patients and is located within the boundaries of Health Education North West a subsidy of £210.00 will be made towards your course fee by the Health Education North West. This will reduce the fee to £500.00.

The course fee payable to the University for this Course does **not** include the NEBDN examination fee of approximately £175.00 (***NEBDN have advised this fee is to be increased and will advise the Training Centre once the new fee amount has been calculated***).
