

Gerodontology

A lecture for the Dental Hygienists and Dental Therapists

Aim:

To highlight some of the unique challenges faced when treating an ageing population in the 21st century

Objectives:

- This lecture will discuss some of the physiological changes that occur in ageing dentitions, coupled with systemic factors that may influence oral health and treatment.
- Treatment strategies and the hygienist's/therapist's role in managing such patients will be highlighted.

Learning outcomes:

- To apply knowledge to clinical practice
- To understand the challenges faced when treating an ageing dentition

Speaker: Carly Taylor BDS MSc MFGDP(UK) FHEA
