

An exciting opportunity for Dentists, Therapists and Hygienists across Greater Manchester

Overview

Gain knowledge and confidence treating periodontal disease on the NHS contract and improve your patients' health.

The 'Healthy Gums Do Matter' programme is designed to support dental teams to effectively manage growing numbers of patients with periodontal concerns in daily practice.

This course will give you guidance and tools on screening, diagnosis and management of this disease through the user friendly toolkit.

Start making changes in management of periodontal disease and patients' outcomes. We encourage you to bring along your Dental Nurse, Hygienist and Therapist to learn as a team.

Delegates will receive a printed copy of the toolkit, electronic resources and an opportunity to join the Greater Manchester support peer group.
