Decontamination Process in the Dental Practice

This course is part of a series of infection control lectures that focuses on specific topics relating to infection control for the whole dental team. Decontamination technicians are welcome.

Overview:

This lecture is designed to refresh and broaden your knowledge of the following:

- Requirements for the correct decontamination of dental instruments
- Step by step procedure of instrument cleaning, sterilisation, storage and maintenance
- Audits, validation and testing of decontaminating equipment
- Our roles and responsibilities in the decontamination process

For full aims, objectives, learning outcomes and to reserve your place visit the Maxcourse website: www.maxcourse.co.uk/henw

Refunds will only be given up to 4 weeks prior to the course date. However, places can be transferred between colleagues if necessary at any time.
