

The aim of this full day hands on course is to give GDPs a valuable & relevant insight into the latest endodontic techniques. It will help GDPs identify which treatments can be confidently undertaken in practice & those that would be better referred. All aspects of diagnosis, preparation & obturation will be covered. This will be a tremendous opportunity for interested practitioners to rehearse & hone their skills with rotary instruments and with two well known local expert specialists at the helm!

Aims

- Discuss different concepts of canal shaping
- Present an overview on the requirements for an ideal obturation

Learning Outcomes

- Be familiar with different concepts of canal shaping
- Be aware of the importance of consistent canal shaping
- Know how to decide which canal shaping technique is appropriate for individual cases
- Making obturation easy
- Indications for the use of different obturation techniques
- An awareness of obturation materials including contemporary sealers
