

An Event for Dentists

Indirect Restorations, Preparation and principles with 'Hands On'

Aim

To improve the planning and provision of crown and bridgework in general dental practice. This day will be an in depth appraisal of crown and bridgework with an opportunity to practice techniques on phantom heads.

Objectives

- To examine the indications for crown and bridgework
- To discuss the need to replace missing teeth and identify the options that are available
- To identify the advantages and disadvantages of the different materials available
- To discuss patient selection and assessment
- To discuss and practice tooth preparation
- To make silicone indexes
- Fabricate good quality temporary crowns
- To discuss cementation and bonding

Learning Outcomes

- Recognise and manage the indications and contraindications for indirect restorations
- Advocate assessing indirect restorations in a structured protocol
- Modify current practice in relation to best clinical guidelines
- Identify factors which affect long-term prognosis of indirect restorations
