

**Health Education England**

# Diagnosis and Management of periodontal disease and an introduction to surgical skills

Health Education England offers this hands-on, practical periodontology course. This course will update practitioners in basic diagnosis and treatment planning, and discuss concepts in risk factors and patient evaluations.

The course, focuses on the following:

- Current concepts in periodontal assessment and treatment planning
- Non-surgical therapy and its limitations
- Basic periodontal surgery, indications, flap design and suturing techniques, using pigs heads
