# WORKING WITH IMPLANTS

**This session for both Clinical Dental Technicians and Dental Technicians will cover history, planning, placement and restoration of dental implants including the use of digital techniques.**

## **Aim**

- The aim of the presentation is to allow the participants to consider the place for dental implants in their daily working life and to understand the relevance for modern restorative dentistry

## **Objectives**

- To deliver an overview of the necessary steps required for successful implant placement and restoration. All participants should be able to discuss with confidence the relevant areas for their future development and area of interest

## **Learning Outcomes**

- Attendees will be more confident when speaking with clinical and technical colleagues and where necessary with patients, about dental implants

## **Venue**

Whiston Education  
Training & Conference Centre  
Nightingale House  
Warrington Road  
Whiston L35 5DR
