

# Radiation Protection & Ionising Radiation Regulations

Improving health and care through education

The aim of the course is to cover the following areas:

- The principles of radiation physics
- Risks of ionising radiation
- Radiation doses in dental radiography
- Factors affecting doses in dental radiography
- The principles of radiation protection
- Statutory requirements
- Selection criteria
- Quality Assurance

The objective is to provide the course participants with adequate training in each of these areas to satisfy the requirements of the IR(ME)R regulations.
