

An Event for Dentists

Implantology

Aim

This lecture will present an overview of the current status of dental implantology and the recent technological & clinical advances in this field to enable the dentist to provide appropriate advice to patients requiring implant treatment as well as maintenance of patients with dental implants

Objectives

- Learn treatment options for the patient with tooth loss
- Learn what implant treatment options might be appropriate for different modalities of tooth loss
- Learn how a GDP should get involved in implant dentistry

Learning Outcomes

After this lecture the learner will be able to:

- Discuss the current status of dental implantology and review the recent technological and clinical advances in this field
- Discuss the educational pathways and career options available to dentists in implant dentistry in the UK
- Discuss the treatment plan options for the management of tooth loss and how to advise patients on dental implant options
- Discuss maintenance of the dental implant patient

This course qualifies for 5 ½ hours verifiable CPD
