

THE HALL TECHNIQUE

Practical Hands- On Session for Dental Educational Supervisors

3
hours
eCPD

This free hands-on course will give practical advice on the use of the Hall Technique as a non-invasive treatment that prevents progression of caries in decayed deciduous molar teeth. Dental Educational Supervisors will gain greater confidence in identifying when and how to use the Hall Crown Technique and mentor Foundation Dentists to do the same.

This course is a mandatory requirement for Dental Educational Supervisors in the North West Area and counts towards educational session requirements.
