

HIV & the Dentist

Improving health and care through education

HIV positive patients are a routine part of dental practice. However, how much do most primary care dental team members know about the management of this condition & the way this impacts on what we do?

This session aims to update our knowledge of HIV management & improve the quality of care we provide to our patients.

Course Aims

- HIV update for dentists
- Epidemiology of HIV in Merseyside
- Clinical symptoms & signs of chronic HIV infection
- Testing patients
- Ethical considerations (partner notification, non-disclosure, insurance)
- Treatment
- Post exposure prophylaxis for the dentist
