Radiation Protection seen through your Radiation Protection File

This thoughtfully designed face-to-face interactive course places a special emphasis on comprehending and constructing a radiation protection file specifically designed for dental practices.

Vital for safeguarding the health and welfare of both patients and dental professionals, this interactive experience offers invaluable insights and practical knowledge essential for a secure and thriving dental environment.

Speaker: Tim Reynolds

With a wealth of experience, Tim has dedicated a significant portion of his career to the field of clinical diagnostic radiography expertise. Tim is a professional lecturer whose journey has been wholly committed to advancing radiography education, specialising in quality assurance and radiation safety.
