

# Clinical Dental Photography

This hands-on session is designed to improve the delegates understanding of the basics of photography, with a introduction to consistent and creative dental photography. It will look at how to educate healthcare professionals on the use of digital Single-lens reflex cameras and how to implement this into daily clinical practice.

## Speaker: Dr Chirag Patel

Chirag has been incorporating SLR photography into clinical practice since 2014, developing a deep understanding of its practical and aesthetic applications in dentistry. His experience as a Dental Core Trainee in Special Care and Oral & Maxillofacial Surgery (OMFS), combined with regular referrals from local colleagues, uniquely positions him to teach photography with both technical expertise and clinical relevance.
