Radiation Protection seen through your Radiation Protection File

This face to face full day course is for all the dental team requiring education and training on the Ionising Radiation Regulations 2000 (IRMER). You will receive practical advice and information on new legislation, radiation principles and risks to ensure you comply with the latest advice.

Speaker: Tim Reynolds

With a wealth of experience, Tim has dedicated a significant portion of his career to the field of clinical diagnostic radiography expertise. Tim is a professional lecturer whose journey has been wholly committed to advancing radiography education, specialising in quality assurance and radiation safety.
