

## **Oral Surgery Skills Enhancement for Dental Nurses.**

**This interactive training session is designed to provide dental nurses with the core knowledge, confidence, and practical skills necessary to effectively support oral surgery procedures within a clinical setting. The course covers a pre-operative assessment, assisting in surgery and post operative care. It has particular emphasis on asepsis (ANTT principles), instrument preparation, donning and doffing techniques, and assisting during oral surgical procedures such as extractions, biopsies, and minor oral surgery (MOS).**

### **Speaker:**

**Emily McMurdo**

Emily is a GDC-registered Dental Nurse with over three years' experience in oral surgery within a busy MOS practice. Dual-trained as a General Adult Nurse, she brings advanced clinical expertise, implant dentistry skills, and exceptional patient care. Level 3 Extended Diploma in Dental Nursing, Level 3 Implant Dentistry, ANTT Certified
