

Occlusion Splints and TMJ Pathology

‘Why it’s all just part of general dentistry’

This seminar will demonstrate how occlusion, TMD and splints are part of Complete Dentistry which incorporates aesthetics, function, structure and health.

Aim

- Increase predictability of your dentistry diagnosis and management of TMD, which splint to use and for how long

Objectives

- To understand the basic principles of occlusion and how they relate to general dentistry
- To understand how to carry out a simple TMJ/Occlusal examination and how to incorporate it into a general examination
- To understand how to make a complete diagnosis including TMJ-occlusal diagnosis
- Be aware of the different splints available and their appropriate usage
- Understand how to move forward with treatment once splint therapy is complete

Learning Outcomes

Delegates will have an understanding of

- Why occlusion impacts on every aspect of dentistry
- How understanding occlusion will make your dentistry more predictable, efficient and long lasting
- Which patients are safe to treat and which to be wary of
- How to discuss occlusal problems with your patients
- Why understanding occlusion will allow you to do more of the dentistry you want to do and enable you to stand out from the crowd

Speaker

Dr. Ian Buckle BDS

Venue:

Royal Salford Hospital
Mayo Education Centre
Stott Lane, Salford
Manchester
M6 8HD
