

A 'Hands On' Course for Dentists

Developing Oral Surgery Skills Part 1

A practical hands-on, interactive session focusing on the assessment and treatment of surgical dentistry patients in general practice. When to treat and when to refer.

Aim

This one day hands on course is aimed at Dental Practitioners with no, or very little, experience of providing MOS in general practice to gain a basic understanding and be able to provide simple MOS procedures where appropriate

Objectives

- Self-assessment of current skills identifying personal development needs
- Mapping of session to delegates personal development
- Choosing appropriate instruments and materials
- Developing awareness of personal abilities and limitations
- Assessment of patients for MOS
- Practice simple MOS techniques; raising a flap, removing bone, removing teeth/roots, placing sutures
- Who, what, when and how to refer appropriately

Learning Outcomes

Delegates will

- Demonstrate the principles of Flap design and Bone Removal
- Demonstrate the principles of suturing
- Identify appropriate surgical instrumentation
- Develop good clinical practice with regards to their role as educational supervisor and as a dental Practitioner
- Discuss appropriate referral procedures

This course qualifies for 3 ½ hours verifiable CPD
