

Clinical Photography

Improving health and care through education

Course Aims

- To introduce the clinicians to the enormous benefits of high quality clinical photography in dentistry
- To inform them what is required for a quality series of extra oral photographs
- To recognise what equipment is necessary to secure quality intra oral photographs
- To understand what comprises a high quality image & what clinical information can be derived from this

Learning Outcomes

- How to use the state of the art digital cameras
- How to instruct their assistants to use the photographic accessories to maximum effect
- How to constructively criticise clinical photographs
- How to use the feedback on the practical session to improve the overall quality of future photographs
