

A 'Hands-On' Course for Dentists

Complete Dentures

Denture problem solving

This one day hands on course will provide you with current thinking on techniques in denture making and how to manage patient's expectations.

Aims

- How to take excellent impressions
- How to record accurately the inter-arch relationship and to know when to take a face-bow record
- How to choose the shape and size of tooth and speech changes

Objectives

- To understand the importance of accurate impressions
- To provide a basis for trouble shooting and to know what to do and when

Learning Outcomes

- Correctly manage complete denture patients and their expectations
- Advocate assessing complete denture patients in a structured protocol
- Modify current practice in relation to best clinical guidelines
- Identify factors which cause problems and how to solve them
