

## Course Overview

This 2½ day course is aimed at providing Registered Dental Nurses with the competencies required to deliver evidenced based individual preventive advice to patients and the skills to apply fluoride varnish as appropriate. All Dental Nurses **must** have a dentist who will act as a mentor; the mentor **must** attend the course with the Dental Nurse for one identified session. Ten case studies will need to be undertaken, two of which will be in-depth. The final assessment will take place at an allocated time **TBC**. Employers must give permission for the dental nurse to attend the course.

### Aim

To prepare a Registered Dental Nurse to deliver safe, evidence based advice and to apply fluoride varnish.

### Learning Objectives

- State the evidence underpinning oral health advice for the public
- Identify the action of fluoride in improving oral health
- Demonstrate technical experience in the application of topical fluoride varnish to both children and adults
- Reflect on the public health role of the dental team in relation to improving oral health

### Learning Outcome

The Dental Nurse with the additional skills will be able to relate evidenced based practice to improving oral health within the context of prevention.

**This course meets the GDC educational criteria and qualifies for 15 hours verifiable CPD**

### Requirements

All nurses booked on must complete the application form accessed via maxcourse and provide:

- GDC Valid certificate stating number and name
