

An Event for Dentists

Improving indirect restorations in General Dental Practice with 'Hands On'

Aim

To improve the planning and provision of crown and bridgework in General Dental Practice, this course will involve working on phantom heads.

Objectives

- To discuss the indications for crown and bridgework and the options available when replacing missing teeth
- To discuss the current materials available, when to utilise them and how they affect preparation design
- To discuss soft tissue management, particularly with regards to the immediate replacement of a failed tooth/teeth
- To discuss the differences and roles of temporary and provisional crowns/bridges
- To discuss key factors in improving the fit, appearance and longevity of restorations

Learning Outcomes

- Candidates will have a greater understanding of the variety of materials and restoration designs available and when to utilise them
- Candidates will have an opportunity to practice preparations of various designs and temporise them
- Candidates will have a greater understanding of the key factors that lead to overall improvements in the provision of indirect restoration in General Dental Practice
