

# An evidence base for non-surgical management: Where are we now?

## A course for Dental Hygienists & Dental Therapists

### Aims

- An update for practicing and training dental hygienists and therapists on modern concepts of debridement
- Clarification on the use of ultrasonics as the primary non-surgical treatment modality
- Discussion points on dietary modification of chronic inflammatory diseases such as periodontitis

### Objectives

- To discuss the role of the host response and biofilm disruption
- To compare and contrast the use of ultrasonic and hand instrumentation
- To address varying debridement techniques based on clinical and laboratory evidence
- To provide a mechanistic understanding for discussing diet with your periodontitis patients, backed up with clinical studies
- To apply these objectives to the “Healthy gums do matter” framework

### Learning Outcomes

- To obtain contemporaneous knowledge on the rationale for debridement
- To be able to objectively assess the pros and cons of various debridement methods
- To be able to provide your patients with appropriate dietary advice as an adjunct to non-surgical periodontal therapy

**This course meets the education criteria set by the GDC and qualifies for 2.5 hours verifiable CPD**

### Speakers

Dr Gareth Brock  
BDS BSc (Hons) PhD MFDSRCS  
FDS(Rest Dent)

### Venue:

MANDEC  
Higher Cambridge Street  
Manchester  
M15 6 FH

### Date:

Wednesday 23<sup>rd</sup> September 2015

### Time:

6.30pm - 9.00pm  
(Registration & refreshments from 6.00pm)

### Cost:

NHS	£15.00
Non NHS	£30.00
