

Snoring & the role of the General Dental Practitioner

A hands on course suitable for Dentists, Clinical Dental Technicians and Dental Technicians

Course Aim

To provide an overview of sleep disordered breathing with special reference to the association of Obstructive Sleep Apnoea & snoring. Aimed at those who either snore themselves or who have patients requesting a solution to this problem.

Course Objectives:

- An explanation of how oral appliances work
- How to safely assess & monitor patients
- An overview of custom & non-custom devices
- Pre-treatment screening
- Overview of medico-legal issues
- Surgery & laboratory requirements & procedures
- Hands-on experience practicing protrusive registration & fitting of a selection of custom-made MRDs to selected participating delegates

Exclusive Offer:- We have secured sponsorship for 3 suitable delegates, who have a snoring problem, to be provided with a custom appliance FREE! If you would like to volunteer to receive a free appliance (value £250) please reply asap as some preparatory technical work is required before the course date & there are some qualifying clinical criteria for suitability. Please contact the course co-ordinator, Jules Arnold-Bryant on 07817 112 557 for further details.
