Awareness Saves Lives

You, your team and Head and Neck Cancer

An Event for the Dental Team

Overview:

This session will provide information on the prevalence of oral cancer at both local and national level. The importance of prevention and early detection and the role of the primary care team in recognising the trigger signs for urgent referral will be examined. Presentations given by nationally and internationally recognised speakers will provide guidance on patient consultation and management; how to refer and utilise the oral cancer toolkit in practice.

Attendance at these events is complimentary. Please book early to avoid disappointment.

For full aims, objectives, learning outcomes and to reserve your place visit the Maxcourse website:
