

Health Education England

Improve your Dental Image

This hands-on session is designed to improve the delegates understanding of the basics of photography. It will look at photographic equipment and will develop their technical skills for clinical practice. There will be an opportunity to discuss auxiliary equipment, techniques used in dental photography, post-production methods and data protection.

Speaker: Pete Clarke

BDS(Hons) MFDS M Perio FDS
(Rest Dent)

Consultant in Restorative
Dentistry and Senior Clinical
Lecturer.

Dental photography in clinical
practice and provide teaching
to Dental Core Trainees and
Postgraduate students on an
annual basis
