

STRICTLY ENDODONTICS:
HOW TO GET THE BEST OUT OF NICKEL TITANIUM
Friday 1st July 2011
PRIDE UNIT, DERRIFORD HOSPITAL, PLYMOUTH

Course Tutor:

Miss Gillian Boswell. BDS, MSc, MRD (Endo) RCS, Specialist in Endodontics.

Organiser

Paul N Bennett BDS DPDS PGCCE "Hand On" Tutor Plymouth

Aims and Objectives

By the end of the day participants should be able to:

Prepare endo-vu blocks and extracted teeth using Nickel Titanium instrumentation

Describe general guidelines for the use of Nickel Titanium instruments

Recognise when to use Stainless Steel and Nickel Titanium instruments

Obturate prepared teeth using warm obturation techniques

Identify when to use different obturation techniques

Learning Outcomes

At the conclusion of this one-day course participants should be able to understand the current rationale for delivery of endodontic treatment and appreciate the various options when considering root canal treatment.

Please note:

Participants will need to bring TWO molar teeth with ACCESS CAVITIES CUT and mounted in squared blocks of impression putty. A radiograph of each should have been taken. Thank you
