

# ***The Problem with Dentures!***

(5 Hours Section 63 CPD)

Graham Stokes  
BDS MFGDP(UK) DPDS DiplImpDentRCS CertMedEd

**Friday 4 November 2011**

**Postgraduate Medical Centre, Bath**

This day's programme will lead you through all the stages of full dentures from diagnosis to after care to help you develop systems and skills to minimize the unpredictability of full denture provision.

**By the end of the session participants should have an understanding of:**

- How to take successful impressions
- How to record accurately the bite
- How to choose the shape and size of tooth
- How to set up the occlusion in full dentures
- How to deal with common complications such as a flabby ridge
- To have understood the need for care on providing good dentures
- To have a better understanding of partial denture design
- To have improved knowledge of the principles and theory of good impression techniques
