1630 End of Course

*This will be an interactive hands-on course using pigs heads. Please note that course timings may change.

Course Aims

To cover basic and some advanced surgical techniques required to competent execution of dentoalveolar surgery, and update participants on current national guidelines for oral surgery.

There will also be an introduction to dentoalveolar procedures available to preserve and replace teeth.

Course Objectives

Expand on theoretical knowledge and understanding of oral surgery required to backup practical surgical skills.

1. Case selection and risk assessment
2. Instrument and techniques
3. Management of common intraoperative and postoperative complications
