

## **Third Molars: have they come back to bite us? (COURSE ID)**

Date and venue:

6-9pm Friday 27<sup>th</sup> September 2013

Plymouth Medical Centre, Derriford Hospital, Derriford Road, Plymouth PL6 8DH

Course Organiser:

Roger Robinson

Course Lecturers:

Professor Tara Renton, Oral Surgery Department, Kings College, London

### **Programme**

1800- 19.00	Registration & buffet supper
19.00 -21.00	Third molars: Did NICE just delay the inevitable? Nerve damage and third molar removal Novel ways of approaching third molar problems

### **Aim**

The overall aim is to provide an update in developments in oral surgery including;

An overview of minimising risk to the trigeminal nerve in dental practice with particular reference to specific procedures including third molar surgery (coronectomy), implant and local anaesthetic

Provide an overview of the outcome of nerve injuries and the challenge in their management.

To provide an update in trigeminal neuropathic pain and its diagnosis and management

### **Learning objectives**

By the end of the evening delegates should be able to:

1. Recognise and minimise risk to the trigeminal nerve when undertaking, LA, extractions, Endo, implants and third molar surgery
2. Understand the importance of prevention of nerve injury and their impact on those patients affected
3. Improve patient consent in relation to trigeminal nerve injuries
4. Develop a better strategy for assessment in identifying patients at high risk
5. When to refer and or treat
