Aim: A development from the previous 'Perfect Perio Planning' courses – this course will include problem solving to assess current treatment planning methods and enable the dental team to improve periodontal treatment planning in general dental practice.

Objectives:

By the end of the session will

1. Effectively identify diagnose types of Periodontal Disease including spotting more challenging cases
2. Use appropriate methods of diagnosis and assessment
3. Formulate Treatment plans for the case studies
4. be able to liaise with other members of the team in providing sound care and management
