AIMS

- To review the basic instrumentation recommended to undertake oral surgery procedures.
- To review the indications for the extraction of third molar teeth.
- To discuss surgical techniques and clinical cases.

- To discuss the identification and management of common emergencies in oral surgery.

OBJECTIVES

By the end of the study day, the participants will be able to:

- To assess and develop treatment plans for patients requiring oral surgery procedures.
- Name at least 10 instruments required to undertake oral surgery and describe their uses.
- Be familiar with the NICE guidelines for the extraction of third molar teeth.
- Describe and undertake three basic suturing techniques.
