Aim: To show the use of dental photography for the development of educational exchange with our patients, fellow professionals and associated businesses and to improve our communication skills

Objectives: By the end of the session delegates should:-

- * Be able to describe the advantages of using dental photography
- * Have improved understanding of how to operate different types of intra-oral & extra-oral cameras
- * Have improved understanding of how to achieve good results in their photographs

Participants are encouraged to bring along their own camera and be prepared to have their photograph taken as they will gain more from the session – other cameras will be available if this is not possible.
