Dental Radiography , Maxillofacial Department, Level 7
Derriford Hospital, Derriford Road, Plymouth PL6 8DH

Course Organiser:

Roger Robinson

Course Lecturers:

Tim Huckstep, Lead Radiographer
Dental and Maxillo-Facial Dept
Derriford Hospital

Programme

11.00am – 11.15am	Registration with Refreshments
11.15am – 12.45pm	How to take good OPTs

Aim:

To give delegates an opportunity to position a person in the OPT machine for optimal results and to discuss justification of and the common errors involved in taking these radiographs

Learning Objectives:

By the end of the course, delegates will know

1. what constitutes justification of the exposure
2. how to position a person in the OPT machine for an optimal exposure
3. how to avoid common positioning faults
4. how to identify radiographic anatomical features on an OPT
