Aim: To give a broad introduction to the main areas of risk assessment using scenario based learning to raise awareness and develop understanding of how to deal with hazards and risks in the workplace.

Objectives: By the end of the course delegates should understand:

The main causes of accidents / ill health and their implications for people at work and how risk assessment links to accident prevention.

Application of the legal requirements for risk assessment as stated under the Management of Health & Safety at Work Regulations.

The principals of risk assessment by using a range of methods and record the outcomes.

Outcome: Participants who complete the course and achieve the required standard will be awarded the 'Chartered Institute of Environmental Health Level 2 Award in Principles of Risk Assessment'.
