**Course Aims.**

1- To discuss partial denture theory with emphasis on : principles of denture design, overdentures, overlay dentures, use of milled crowns, management of free end saddles and briefly rehabilitation of patients with palatal defects.

2- To discuss complete denture theory with emphasis on : principles of complete denture design, impression techniques, occlusal registration techniques, management of flabby ridges and basic implant retained overdentures..

**Course Objectives.**

By the end of the course, participants will;

1- Have a working understanding of partial and complete denture design.

2- Appreciate which impression and occlusal registration techniques may be appropriate when managing a removable prosthodontics patient.

3- Understand how to design overlay/overdentures.

4- Understand how to manage a patient with combination syndrome.

5- Understand the principles of duplicate and immediate denture prosthodontics.

6- Have an understanding of basic implant retained overdenture design.

7- Appreciate that patients with palatal defects can be rehabilitated with obturators and need referral to a specialist centre

**Lecturers**

Rahat qualified with a First Class Honours in Physiology in 2001 and then Dentistry in 2004 from Bristol. He then spent time in General Practice before undertaking specialist training at the Leeds Dental Institute. Rahat is a passionate teacher and provides many lectures for both undergraduates and postgraduates on all aspects of restorative dentistry across the country.

He completed his specialist training in 2015 and completed his fellowship in Head and Neck Oral Cancer Rehabilitation with the North Western Deanery in 2016. He is now a consultant at Liverpool Dental Hospital and also based in Specialist Practice in Manchester.

Asma is a Clinical Teaching Fellow in Restorative Dentistry at the University of Leeds and is currently doing a PhD in the field of Dental Composites. She has spent time in General

practice has held several hospital appointments and has completed an MSc in Restorative Dentistry as well as her Membership Diploma from the Faculty of Dental Surgeons (Ed).
